Summary

Experienced Software Engineer with a proven track record in backends, APIs, .NET, client/server, and distributed systems using relational and NoSQL databases. Skilled in reducing costs and improving user experience. Interested in modern microservice architectures, functional programming, and Golang.

Skills

Back-end	ASP.NET, REST API
Databases & Messaging	MongoDB, Aerospike, Redis, MariaDB, SQL Server, SQLite, Vertica, Kafka, Cassandra, ClickHouse
Programming	C#, Bash
Observability	ELK, Grafana, Dynatrace, Prometheus, Open Telemetry
Operating Systems	Linux, macOS, Windows
DevOps	AWS, Azure, Docker, Kubernetes, Jenkins, TeamCity, GitLab
Languages	Russian (native), English (C1), Polish (beginner)

Experience

BroIT

Minsk, Belarus

Senior Software Engineer — *Sept. 2023 – Present*

- As part of the backend team, developed core services for a gambling and betting transaction aggregator in .NET 9 from the ground up. Cassandra and MongoDB as project databases; on-premises Kubernetes for orchestration; GRPC+Protobuf as interservice communication, Kafka as async transport between services.
- Implemented analytics and reporting engine with ClickHouse scripts and subsequent optimizations.
- Developed a Keycloak SPI plugin in Java to capture significant security events for project audit system.
- Created Grafana dashboards for metrics visualization (Percona, Clickhouse-based).
- Limited experience in revieweing Go merge requests and writing Python tooling for deployment atomation.
- Conducted technical interviews for .NET team candidates.

Finstek Ltd.

Minsk, Belarus

Senior Software Engineer — *Jun. 2023 – Sept. 2023*

- Together with the frontend team, designed and implemented a trading robots SDK proof of concept. Researched cross-platform .NET 7 client implementation (Windows, Mac), installer packaging and signing (MSIX, dmg), WebSockets and REST communication between Bot manager, Bots, and browser-hosted WebTrader app. Added Blazor UI integration for bots. Developed Bot Market portal backend POC for uploading, downloading, and upgrading trading bots to the latest versions.
- Developed parts of MembersArea web portal in Azure for forex trader identity management.
- For TraderPlatform team, designed and developed a .NET 7 microservice to store user-provided chart drawings in SQLite database.

Sababa Labs/Playtika Ltd.

Minsk, Belarus

Senior Software Engineer — *Aug. 2019 – Feb. 2023*

- As part of the backend team, migrated .NET 4.5 monolithic gaming backend to microservices, reducing operational costs by approx. $2M/year by moving high-load backend (600K daily active users) from Windows/AWS to Linux and private DC with Kubernetes and Netflix stack (Eureka, Zuul, Hystrix, Ribbon). CI/CD with Jenkins and TeamCity; staging, QA, preprod, and prod with canary deployments.
- Revamped Minigames feature by extending gaming monolith REST API and Aerospike storage, improving UX and monetization. Led a mini-team of 2 QA, 2 Unity developers, and myself as backend lead.
- Reduced players waiting time and improved tournament experience by implementing a new microservice in .NET Core for custom Journey step (tournament end) based on points instead of tournament ending time.
- Reimplemented Facebook, Apple, and Guest login based on Playtika services and JWT provider, subsequent optimizations.
- Assisted in reducing production incident time by 30% during on-duty support, monitoring, NOC, and SLS assistance using Prometheus, Grafana, ELK, Kibana, Dynatrace.

CompatibL LLC

Minsk, Belarus

Software Engineer — *Apr. 2008 – Aug. 2019*

- Implemented backend part in .NET/.NET Core for accounting and internal assets reporting system for a U.S. bank and stockbroker Charles Schwab.
- Delivered custom XVA solution implementations on CompatibL Analyst platform (Windows, .NET) for major European, U.S., and South African banks.

- CompatibL Analyst platform extensions and customer data integration (SQL Server, Sybase ASE, Oracle).

ScienceSoft Inc. *Minsk, Belarus*

Software Engineer *Jan. 2006 – Apr. 2008*

- Developed a WinForms + SqlServer desktop application for Estonian State Registry Office.
- Maintained and developed a WinForms production equipment load balancer tool for Baxter Pharmaceuticals.

VPI Development Center *Minsk, Belarus*

.NET Developer *Jun. 2003 – Nov. 2005*

- Development of WinForms product for rapid design of optical transport networks.
- Implemented an XSLT-based templating engine to transform XML data into SVG equipment images.

Coherent Solutions *Minsk, Belarus*

Junior C++ Developer *Mar. 2002 – Jun. 2003*

- Online community portal featuring news aggregator, groups organizer and events planner in C++ and HTML.

Education

Belarusian State Polytechnic Academy *Minsk, Belarus*

B.S. in Industrial Robots and Robotic Systems *1995–2000*

- Robotics engineer

Certifications

Microsoft

Microsoft Certified Professional ".NET Framework—Application Development Foundation" *2007*
